Number of channels established in the EU (2009-2012)

What convergence really means...

- Traditional broadcast services and over the top content on the same screen (TV set or mobile device)
- Parallel usage of a second screen device
- Connexion between the mobile device and the TV set
- And who knows what the future will bring...

Ingredients for growth are familiar

- Scale – Network effects
- Attractive content to attract an overloaded viewer
- Interoperability
- New financing models?
- A regulatory framework that guarantees values

A possible regulatory debate

- More or less regulation?
- Key concepts:
 - Linear vs. non-linear
 - “audiovisual media service”
 - jurisdiction

Another way to see this debate

- What are the values we want to protect?
- What is the best way to achieve it?

Links with the telecom framework

- Spectrum
- Article 31 USD (must-carry rules)
- Article 6(4) Access Directive
